Notes

- Digital stations with a TSA population under 0.5m may have sampling constraints which will be assessed on application. This could result in a bespoke fee being charged.
- New local digital only stations are encouraged to adopt an existing commercial analogue station's TSA, and continue to mirror this on an ongoing basis in the event of it changing, in order to qualify for the above listed rates. If a new local digital only station creates a bespoke TSA then fees will be quoted for on an individual basis once the research requirements have been obtained and assessed.
- Existing local digital only stations changing their TSA will be encouraged to adopt an existing commercial analogue station's TSA, and continue to mirror this on an ongoing basis in the event of it changing, in order to qualify for the above listed rates. If an existing local digital only station creates a bespoke TSA then fees will be quoted for on an individual basis once the research requirements have been obtained and assessed.
- Ratecard band G3r has been removed as of Q2 2018. Existing stations which are already on this band will be able to remain on this band. If the existing station moves to a new TSA, the G3r rate card band will no longer be applicable.
- Heritage station discounts will not be applicable in the event of a name, format or ownership change.
- Licensed community radio stations do not fall within the Commercial Radio Ratecard and each application will be individually assessed and costed subject to sampling requirements.
